VOL. XII.—EIGHTH SERIES

JULY—DECEMBER 1965

LONDON:
TAYLOR & FRANCIS LTD, RED LION COURT, FLEET STREET, E.C.4

"Meditationis est perscrutari occulta; contemplationis est admirari perspicua.... Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem."—*Hugo de S. Victore.*

——"Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condat,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu."

J. B. Pinelli ad Mazonium.

66 58806

CONTENTS OF VOL. XII. Nos. (115–120)

(EIGHTH SERIES)

NUMBER 115—JULY

PAGE

Determination of the Slip Systems in Single Crystals of Tungsten Monocarbide. By T. Takahashi and E. J. Freise, Department of Materials Science, Northwestern University, Evanston, Illinois..... 1

Work Hardening and Deformation Sub-structure in Iron Single Crystals Deformed in Tension at 298°K. By A. S. Keh, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania..... 9

On the Formation of Interstitial Loops in B.C.C. Metals. By B. L. Eyre and R. Bullough, U.K.A.E.A. Research Group, Harwell, Didcot, Berks..... 31

Further Observations on the Effect of Repeated Pressurization on Yielding and Brittleness. By F. M. C. Besag and F. P. Bullen, Aeronautical Research Laboratories, Australian Defence Scientific Service, Melbourne, Australia..... 41

The Interpretation of the Hall Effect in the Silver–Gold System. By C. M. Hurd, Division of Applied Chemistry, National Research Council, Ottawa, Canada..... 47

Anisotropy of Relaxation Time in Silver–Gold Alloys. By V. Heine, Cavendish Laboratory, University of Cambridge..... 53

The Mechanism of Cavitation in Magnesium during Creep. By R. T. Ratcliffe and G. W. Greenwood, Central Electricity Generating Board, Berkeley Nuclear Laboratories, Berkeley, Glos..... 59

The Low Temperature Electrical Transport Properties of Nickel and Dilute Nickel–Copper Alloys. By D. Greig and J. P. Harrison, Physics Department, University of Leeds..... 71

Slip Line and Dislocation Structures in Fatigued Copper. By C. Roberts and A. P. Greenough, Metallurgy Department, University College of Swansea..... 81

The Absorption of Sound Waves in Perfect Dielectric Crystals. By H. J. Maris, Case Institute of Technology, Cleveland, Ohio, U.S.A..... 89

Magnetoresistance and Hall Effect due to Bragg Reflection of Free Electrons in Aluminium. By Jens Feder and Jens Lothe, Institute of Physics, University of Oslo, Blindern, Norway..... 107

Size-dependence of the Hall Effect in Aluminium Films. By I. Holwech, Institute of Physics, University of Oslo, Blindern, Norway... 117

The Nature of Faulted Defects in Low Stacking-fault Energy Alloys. By M. H. Loretto, Division of Tribophysics, Commonwealth Scientific and Industrial Research Organization, University of Melbourne..... 125

Deformation and Fracture of Thoria. By A. Gilbert, Metal Science Group, Battelle Memorial Institute, Columbus Laboratories, Columbus, Ohio 139

The Energy Spectra of Atoms Slowing Down in Structureless Media. By Mark T. Robinson, Metallurgy Division, Atomic Energy Research Establishment, Harwell, Berks..... 145

PAGE

Thermal Expansion of Germanium and Silicon at Low Temperatures. By R. H. Carr, R. D. McCammon and G. K. White, Division of Physics, Commonwealth Scientific and Industrial Research Organization, Sydney, Australia 157

Thermoelectric Power of Ice Containing HF and NH_3. By G. W. Bryant and N. H. Fletcher, Department of Physics, University of New England, Armidale, N.S.W., Australia 165

An X-ray Topographic Study of Planar Growth Defects in a Natural Diamond. By B. Lawn, Y. Kamiya and A. R. Lang, H. H. Wills Physics Laboratory, University of Bristol 177

Correspondence:

The Stacking-fault Energy of F.C.C. Metals. By I. L. Dillamore and R. E. Smallman, Department of Physical Metallurgy, University of Birmingham 191

The Elastic Energies of Symmetrical Dislocation Loops. By D. J. Bacon and A. G. Crocker, Department of Physics, Battersea College of Technology, London, S.W.11 195

Diffraction Contrast from Platelet Precipitates in Chromium. By R. I. Garrod and H. L. Wain, Aeronautical Research Laboratories, Australian Defence Scientific Service, Melbourne, Australia 199

On the Plastic Flow Induced by Partial X-ray Irradiation of NaCl. By J. L. Alvarez Rivas and F. Agulló-Lopez, División de Física, Junta de Energía Nuclear, Madrid, Spain 205

On the Configurational Average of the Green's Function for Liquid Metals. By J. B. Jalickee, T. Morita and T. Tanaka, The Catholic University of America, Washington, D.C. 209

Nuclear Magnetic Resonance in Bulk Nickel Samples. By Lawrence H. Bennett, Metallurgy Division, Institute for Materials Research, National Bureau of Standards, Washington, D.C. 213

Reviews of Books 217

NUMBER 116—AUGUST

Neutron Diffraction Measurements on Pure and Doped Synthetic Hematite Crystals. By N. A. Curry and G. B. Johnston, Solid State Physics Division, Atomic Energy Research Establishment, Harwell, England, and P. J. Besser and A. H. Morrish, University of Minnesota, Minneapolis, Minn., U.S.A. 221

Twinning and Fracture in Zinc Single Crystals. By D. J. Burr and N. Thompson, H. H. Wills Physics Laboratory, University of Bristol 229

Soft X-ray Emission Spectra of Non-dilute Aluminium–Magnesium Alloys. By A. Appleton and C. Curry, Department of Physics, The University of Leeds 245

The Thermal Expansion of Sodium Fluoride at Low Temperatures. The Grüneisen Parameters of Sodium Fluoride and Rubidium Bromide. By B. W. James and B. Yates, Department of Pure and Applied Physics, Royal College of Advanced Technology, Salford, 5, Lancs 253

An Electron Microscope Study of Neutron Irradiation Damage in Alpha-iron. By B. L. Eyre and A. F. Bartlett, Metallurgy Division, A.E.R.E., Harwell, Berks 261

PAGE

Some Observations of Discontinuous Yielding Phenomena in Copper, Nickel and Aluminium after Shock Loading. By A. S. Appleton and J. S. Waddington, Department of Metallurgy, The University of Liverpool 273

A Study of Repeated Twinning, Lattice Imperfections and Impurity Distribution in Amethyst. By H. H. Schlössin and A. R. Lang, H. H. Wills Physics Laboratory, University of Bristol 283

Influence of Long-range Order upon Strain Hardening. By R. G. Davies and N. S. Stoloff, Scientific Laboratory, Ford Motor Company, Dearborn, Michigan 297

Slip Character and the Ductile to Brittle Transition of Single-phase Solids. By T. L. Johnston, R. G. Davies and N. S. Stoloff, Scientific Laboratory, Ford Motor Company, Dearborn, Michigan 305

Ductile Fracture in Copper Single Crystals. By S. Saimoto, W. F. Hosford, Jr., and W. A. Backofen, Metals Processing Laboratory, Massachusetts Institute of Technology, Cambridge, U.S.A. 319

An Electron Microscope Investigation of the Temperature Dependence of the Magnetization Directions in Cobalt and Nickel. By P. J. Grundy, Department of Physics, University of Sheffield 335

Calculations on the Temperature Dependence of the Knight Shift in Liquid Metals at Constant Volume and its Measurement in Sodium. By Mitsuo Watabe and Minoru Tanaka, The Institute of Solid State Physics, University of Tokyo, Azabu, Tokyo, Japan, and Hirohisa Endo and B. K. Jones, Division of Pure Physics, National Research Council of Canada, Ottawa, Canada 347

The Effect of Impurity and Forest Dislocations on τ_s/τ_g for Copper Crystals. By P. C. J. Gallagher, Cavendish Laboratory, Cambridge .. 355

Effect of Solute Atoms on Stacking Faults in Cu–Ni and Cu–Mn Systems. By K. Nakajima, Toyota Central Research and Development Laboratories, Inc., Nagoya, Japan, and K. Numakura, The Research Institute for Iron, Steel and Other Metals, Tohoku University, Sendai, Japan 361

The Calculation of Shear Stress and Shear Strain for Double Glide in Tension and Compression. By D. K. Bowen and J. W. Christian, Department of Metallurgy, University of Oxford 369

The Hardness of Alkali Halide Crystals Containing Divalent Ion Impurities. By J. S. Dryden, Setsu Morimoto and J. S. Cook, Division of Applied Physics, National Standards Laboratory, C.S.I.R.O., University Grounds, City Road, Chippendale, N.S.W., Australia 379

Short-range Forces and the Dielectric Properties of Solid Argon. By S. Doniach, Physics Department, Imperial College, London, S.W.7, and R. Huggins, Physics Department, Queen Mary College, London, E.1 393

Correspondence

Dislocation Multiplication. By C. N. Reid, Department of Physical Metallurgy, Birmingham University, and A. Gilbert and A. R. Rosenfield, Battelle Memorial Institute, Columbus, Ohio 409

Electron Spin Resonance in Diamond Coat. By E. A. Faulkner, P. W. Whippey and R. C. Newman, J. J. Thomson Laboratory, University of Reading, Reading, Berkshire, England 413

The Observation of Defect-activated One-phonon Infra-red Absorption in Diamond Coat. By J. F. Angress and S. D. Smith, J. J. Thomson Physical Laboratory, University of Reading 415

Effect of Neutron Radiation on Rhenium. By J. L. Brimhall and B. Mastel, Battelle-Northwest, Pacific Northwest Laboratory, a division of Battelle Memorial Institute, Richland, Washington 419

PAGE

Experimental Study of Vapour-grown CdS Crystal Platelets. By R. J. Caveney, Department of Physics, University of the Witwatersrand, Johannesburg 423

'Microstrain' in Neutron Irradiated Copper Crystals. By J. V. Sharp and M. J. Makin, Metallurgy Division, A.E.R.E., Harwell, England 427

Magnetic Properties of Copper Acetate at Low Temperatures. By S. C. Mathur, R–P & VE–MEE, Marshall Space Flight Center, Huntsville, Alabama, U.S.A. 431

Conduction Electron Spin Resonance in Lithium–Magnesium Solid Solutions. By G. D. Wignall, J. E. Enderby, C. E. W. Hahn and J. M. Titman, The Physics Department, The University, Sheffield 10 433

Coercive Force in Thin Permalloy Films. By R. H. Wade, Department of Engineering Physics, Cornell University, Ithaca, New York 437

Book Notices 443

NUMBER 117—SEPTEMBER

X-ray Line Broadening in Neutron Irradiated Magnesium Oxide. By D. G. Walker and B. S. Hickman, Materials Physics Section, Australian Atomic Energy Commission, Research Establishment, Lucas Heights, Sydney, N.S.W. 445

On Misfit Dislocations in the Diffusion Zone of a Bicrystal System. Part 2. Forces in the Redistribution of Misfit Dislocations. By J. S. Vermaak and J. H. van der Merwe, University of Pretoria, Pretoria, South Africa 453

Plastic Relaxation of Crack Tip Stresses in α-quartz. By H. H. Schlössin, Department of Physics, University of the Witwatersrand, Johannesburg 467

Plastic Bending of Diamond Plates. By T. Evans and R. K. Wild, The J. J. Thomson Physical Laboratory, Whiteknights Park, The University of Reading, Berkshire, England 479

Grain Boundary Diffusion of Iron, Cobalt and Nickel in Alpha-iron and of Iron in Gamma-iron. By D. W. James, Westinghouse Research Laboratories, Pittsburgh 35, Pennsylvania and G. M. Leak, Department of Metallurgy, University of Manchester 491

Kinetics and Mechanism of Formation of Forsterite (Mg_2SiO_4) by Solid State Reaction of MgO and SiO_2. By G. W. Brindley, and Ryozo Hayami, Materials Research Laboratory, The Pennsylvania State University, University Park, Pennsylvania 505

The Multiple Compton Scattering of Low Energy Gamma Radiation. By P. J. Brockwell, Department of Statistics, Australian National University, Canberra 515

The Model Potential for Positive Ions. By I. V. Abarenkov and V. Heine, Cavendish Laboratory, Cambridge, England 529

The Effect of Weak Bragg Reflected Beams on the Absorption of Electrons. By C. R. Hall and P. B. Hirsch, Cavendish Laboratory, Cambridge 539

On the Macroscopic Distribution of Dislocations in Single Crystals of High-purity Recrystallized Aluminium. By A. Authier, C. B. Rogers and A. R. Lang, H. H. Wills Physics Laboratory, University of Bristol 547

PAGE

Young's Modulus of Pyrolytic Carbon in Relation to Preferred Orientation. By R. J. Price, General Atomic Division of General Dynamics Corporation, John Jay Hopkins Laboratory for Pure and Applied Science, San Diego, California 561

The Nucleation of Radiation Damage in Graphite. By W. N. Reynolds and P. A. Thrower, Metallurgy Division, A.E.R.E., Harwell, Berks 573

The Deformation of Magnesium Single Crystals. By P. B. Hirsch and J. S. Lally, Cavendish Laboratory, Cambridge 595

Correspondence:

The Effect of Strain Rate on Dislocation Multiplication in Polycrystalline Molybdenum. By A. Gilbert, B. A. Wilcox and G. T. Hahn, Metal Science Group, Battelle-Columbus Laboratories, 505 King Avenue, Columbus, Ohio 43201 649

Reviews of Books 655

NUMBER 118—OCTOBER

The Effect of Crystallization Conditions on Radiation-induced Crosslink Formation in Polyethylene. Part I. The Basic Radiation–Solubility Relationship. By T. Kawai and A. Keller, H. H. Wills Physics Laboratory, University of Bristol, Royal Fort, Bristol 8, and A. Charlesby and M. G. Ormerod, Physics Department, Royal Military College of Science, Shrivenham, Swindon, Wilts. 657

The Effect of Crystallization Conditions on Radiation-induced Crosslink Formation in Polyethylene. Part II. The Effect of Lamellar Packing and Inter-lamellar Ties. By T. Kawai and A. Keller, H. H. Wills Physics Laboratory, University of Bristol, Royal Fort, Bristol, 8.. 673

The Effect of Crystallization Conditions on Radiation-induced Crosslink Formation in Polyethylene. Part III. Free Radical Formation and Reactions. By M. G. Ormerod, Physics Department, The Royal Military College of Science, Shrivenham, Swindon, Wilts 681

The Effect of Crystallization Conditions on Radiation-induced Crosslink Formation in Polyethylene. Part IV. Annealing and Crosslink Formation in Single Crystals. By T. Kawai and A. Keller, H. H. Wills Physics Laboratory, Royal Fort, University of Bristol, Bristol..... 687

The Effect of Crystallization Conditions on the Radiation-induced Crosslinking in Polyethylene. Part V. The Soluble Crosslinked Molecule. By T. Kawai and A. Keller, H. H. Wills Physics Laboratory, University of Bristol, England 699

On the Electronic Structure of Disordered Systems. By T. Lukes, Department of Physics, Northampton College of Advanced Technology, London 719

The Ceramic Properties of Nickel Ferrite and the Porosity Broadening of the Ferromagnetic Resonance Linewidth. By A. J. Pointon and J. M. Robertson, Physics Department, College of Technology, Portsmouth 725

The Structure of Explosively Shocked MgO Crystals. By Mark J. Klein, Metal Science Group, Battelle Memorial Institute, Columbus, Ohio, U.S.A. 735

PAGE

The Influence of the Scattering Law on the Radiation Damage Displacement Cascade. By Mark T. Robinson, Metallurgy Division, Atomic Energy Research Establishment, Harwell, Berks..... 741

Effects of Substrate Temperature on the Growth of Thin Platinum Deposits on Rock Salt. By G. Gardner Sumner, Texas Instruments Incorporated, Dallas, Texas..... 767

Deformation of Single Crystals of Iron 3% Silicon. By F. W. Noble and D. Hull, Department of Metallurgy, The University, Liverpool.... 777

The Compton Profile of Lithium. By Malcolm Cooper and J. A. Leake, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England, and R. J. Weiss, U.S. Army Materials Research Agency, Watertown, Massachusetts 02172, U.S.A..... 797

X-ray Line Broadening and Stored Energy in Deformed and Annealed Calcite. By K. A. Gross, Department of Geophysics, The Australian National University, Canberra, Australia..... 801

The Scattering of High Energy Electrons by the Thermal Vibrations of Crystals. By C. R. Hall, Cavendish Laboratory, Cambridge..... 815

The Effect of Variations in Stacking-fault Energy on the Creep of Nickel–Cobalt Alloys. By C. K. L. Davies, P. W. Davies and B. Wilshire, Metallurgy Department, University College, Swansea..... 827

The Interpretation of Field-ion Micrographs: Streak Contrast. By S. Ranganathan, K. M. Bowkett, J. Hren and B. Ralph, Department of Metallurgy, Cambridge University..... 841

An Electrical Resistivity Study of Deformation and Recovery of Iron at Low Temperature. By L. J. Cuddy, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania..... 855

On the Effect of the Crystalline Structure on Fatigue: Comparison between Body-centred Metals (Ta, Nb, Mo and W) and Face-centred and Hexagonal Metals. By A. Ferro, P. Mazzetti and G. Montalenti, Istituto Elettrotecnico Nazionale Galileo Ferraris, Torino..... 867

Reviews of Books..... 877

NUMBER 119—NOVEMBER

Stacking-fault Strengthening. By P. B. Hirsch and A. Kelly, Cavendish Laboratory and Department of Metallurgy, University of Cambridge..... 881

Time Dependence and Other Effects on the Tracer Diffusion of ^{113}Sn in Titanium. By A. G. Gregory and J. Askill, Department of Physics, University of Reading, Berkshire, England..... 901

A Note on Sector Boundaries in Polymer Crystals. By D. C. Bassett, Bell Telephone Laboratories Incorporated, Murray Hill, N.J., U.S.A.... 907

Monovacancy Formation Energy and Debye Temperature of Close-packed Metals. By K. Mukherjee, Department of Material Sciences, State University of New York, at Stony Brook, New York..... 915

Helium and Argon Diffusion in Magnesium. By H. R. Glyde and K. I. Mayne, Clarendon Laboratory, Oxford..... 919

The Diffusion of Iron in 3% Silicon Iron. By B. Mills, G. K. Walker and G. M. Leak, Department of Metallurgy, University of Manchester..... 939

PAGE

Non-uniform Impurity Distributions in Yttrium Aluminium Garnet Single Crystals. By B. Cockayne, Ministry of Aviation, Royal Radar Establishment, Malvern, Worcs. ... 943

A Rate Controlling Mechanism for Slip in Neutron Irradiated Copper Single Crystals. By T. J. Koppenaal, Metallurgy Division, Argonne National Laboratory, Argonne, Illinois and R. J. Arsenault, Metallurgy Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee. ... 951

Thermal Glow Peaks in KCl : Tl Around Room Temperature. By R. V. Joshi and A. K. Menon, Physics Department, M.S. University, Baroda, India. ... 963

Etch Pits and Dislocations in Cronstedtite. By R. Steadman and J. D. Pugh, Department of Physics, Bradford Institute of Technology, Bradford 7, England. ... 969

The Magnetic Properties of Cadmium Manganite. By S. K. Dey and J. C. Anderson, Department of Electrical Engineering, Imperial College, London, S.W.7. ... 975

Dislocation Enhanced Impurity Diffusion. By H. M. Morrison, Solid State Physics Laboratory, Department of Natural Philosophy, University of Edinburgh. ... 985

Helium Diffusion in Aluminium. By H. R. Glyde and K. I. Mayne, Clarendon Laboratory, Oxford. ... 997

A Metallographic Study of Iron Fatigued in Cyclic Strain at Room Temperature. By R. P. Wei and A. J. Baker, United States Steel Corporation, Applied Research Laboratory, Monroeville, Pennsylvania. ... 1005

Crack Propagation in Single Crystals of Tungsten. By D. Hull, P. Beardmore and A. P. Valintine, Department of Metallurgy, University of Liverpool, England. ... 1021

Cyclic Twinning in Fatigued Close-packed Hexagonal Metals. By P. G. Partridge, Royal Aircraft Establishment, Farnborough, England. 1043

Correspondence :

Thermodynamics of Vacancies in Binary Alloys. By F. W. Schapink, Laboratorium voor Metallkunde, Technische Hogeschool, Delft, The Netherlands ... 1055

Nuclear Magnetic Resonance of Nickel and Titanium in some Intermetallic Compounds. By L. E. Drain, Solid State Physics, Division, A.E.R.E., Harwell and G. W. West, Division of Tribophysics, C.S.I.R.O., University of Melbourne, Australia. ... 1061

Electret Domains in Individual Trioxane Polycrystals. By H. B. van der Heijde, Koninklijke/Shell-Laboratorium, Amsterdam (Shell Research N.V.) ... 1065

Notes on Polyoxymethylene Whiskers, Hedrites, Axialites. By H. B. van der Heijde, Koninklijke/Shell-Laboratorium, Amsterdam (Shell Research N.V.) ... 1071

Mechanical Twinning in Lead Single Crystals. By G. F. Bolling, K. W. Casey and R. H. Richman, Ford Motor Company, Dearborn, Michigan ... 1079

Hole Formation in Crystal Growth by Surface Adsorption of an Impurity. By I. Minkoff, Department of Metallurgy, University of Cambridge ... 1083

Experimental Evidence for Segregation to Threefold Nodes. By M. H. Loretto, Commonwealth Scientific and Industrial Research Organization, Division of Tribophysics, University of Melbourne ... 1087

Reviews of Books ... 1091

NUMBER 120—DECEMBER

PAGE

On the Recovery of Aluminium after Neutron Irradiation at 78°K. By T. Federighi and S. Ceresara, I.S.M.L., Novara, Italy, and F. Pieragostini, SORIN, Saluggia, Italy 1093

Influence of the Amount of Strain at 78°K on the Recovery Process in Al 99·995%. By S. Ceresara, H. Elkholy and T. Federighi, Istituto Sperimentale dei Metalli Leggeri, C.P. 129, Novara, Italy..... 1105

Crystallite Size, Strain and Shape Determinations on Thoria from x-ray Line Broadening Studies. By I. F. Ferguson, Chemistry Division, A.E.R.E., Harwell, Berks. 1115

The de Haas–van Alphen Effect in Dilute Alloys of Silver and Gold. By P. E. King-Smith, Royal Society Mond Laboratory, Cambridge..... 1123

The Dislocation Content of a Large Angle Tilt Boundary. By R. Bullough, Department of Mining, Metallurgy and Petroleum Engineering, University of Illinois, Urbana, Illinois..... 1139

The Role of Contaminants in the Epitaxial Growth of Gold on Sodium Chloride. By J. W. Matthews, School of Engineering and Applied Science, University of Virginia, Charlottesville, Virginia..... 1143

Conversion of Crystalline Germanium to Amorphous Germanium by Ion Bombardment. By J. R. Parsons, Chalk River Nuclear Laboratories, Atomic Energy of Canada Limited, Chalk River, Ontario, Canada 1159

Radiation Damage in Uranium Dioxide. By A. D. Whapham and B. E. Sheldon, Atomic Energy Research Establishment, Harwell Berkshire 1179

Observations on the Thermal Defect Structure of Solid Argon. By O. G. Peterson, D. N. Batchelder and R. O. Simmons, Materials Research Laboratory and Department of Physics, University of Illinois, Urbana, Illinois..... 1193

Energy and Orientation Effects of Electron Irradiation in Silicon. By I. N. Haddad, P. C. Banbury and J. A. Grimshaw, J. J. Thomson Physical Laboratory, University of Reading, England..... 1203

Whisker Growth within Single Crystals of Magnesium Oxide. By D. I. Matkin and D. H. Bowen, Metallurgy Division, A.E.R.E., Harwell, Berks..... 1209

A Debris Mechanism of Cyclic Strain Hardening for F.C.C. Metals. By C. E. Feltner, Scientific Laboratory, Ford Motor Company, Dearborn, Michigan..... 1229

The Screened Model Potential for 25 Elements. By A. O. E. Animalu and V. Heine, Cavendish Laboratory, Free School Lane, Cambridge, England 1249

de Haas–van Aphen Effect and Fermi Surface of the Intermetallic Compounds $AuAl_2$, $AuGa_2$ and $AuIn_2$. By J.-P. Jan, W. B. Pearson, Y. Saito, M. Springford and I. M. Templeton, Division of Pure Physics, National Research Council, Ottawa, Canada 1271

Dislocation Structures in Fatigued Iron–Carbon Alloys. By J. T. McGrath and W. J. Bratina, Ontario Research Foundation, Toronto, Ontario, Canada 1293

Reviews of Books 1307

Subject Index 1309
